## **AppInt technical information**

HTML is the most recommended - adjusted to fill the entire screen (100% height and width)

#### HTML

- HTML must be set with 100% width and height.
   Example <div style="width: 100%;height: 100%;</li>
- Need to keep at least 80px from the top without any content (To avoid hiding content in the upper screen)
- HTML must not include the click through URL. Otherwise, click won't be recorded.
   The URL should be provided separately.
- Avoid using external JavaScript and CSS libraries such as jQuery in your HTML. Instead, embed images directly as SVGs.
- Use JS and CSS methods that supported by all devices (Can be checked here).
- The following part should not be included in the HTML code <!DOCTYPE html></html>

#### Image

• Color #css is required – Mention the CSS color code needed for the top and bottom edges of the image to achieve a seamless blend with the background.

#### Third-Party

- Color #css is required Mention the CSS color code needed for the top and bottom edges
  of the image to achieve a seamless blend with the background.
- · The click-through URL should be inserted within the Third-Party tag

Туре	Size	Technical
HTML	100% width and height	HTML + URL
Image	320x480 I 1024X768	Image [up to 140KB] + URL or tag + Color #css
Third-Party	320x480 I 1024X768	Third-Party tag + Color #css

Image + Third Party tag - centered within the screen

HTML - adjusted to fill the entire screen

## **Investing.com Technical Requirements**

#### Accepted creative types in Investing.com System

- Image: A basic image creative. Requires a GIF, JPG, or PNG file + a landing page URL. The file should not exceed 140KB.
- DoubleClick tag: A creative hosted by DoubleClick. Provide a URL rather than a snippet for the creative.
- Third Party Tag: A highly customizable, interactive creative. You can
  use any custom HTML and JavaScript snippets as well as tags from a
  third-party ad server or DoubleClick for Advertisers.
  - **Must be https** http-embedded tags cannot be viewed on any Investing.com domain.
  - For this option, make sure the code include **Click Macros**
  - The tags should also contain backup static images in the creative pool.

#### clickTAG implementation

- Insert the clickTAG in the .fla file before converting it to the .swf file that is uploaded in DFP.
- The clickTAG variable is properly implemented in the action of the button. In the getURL()function of the action, make sure to specify the clickthrough URL as clickTAG and the target window as "blank".
- Example 1 : getURL(clickTAG," blank");.

A more detailed documentation for clickTAG implementations can be reviewed in the below link:

www.adobe.com/resources/richmedia/tracking/designers\_guide.

#### **Content (Creatives) Requirements and Guidelines:**

Please make sure that the creatives used do not have:

- BR Site creatives cannot contain the word Forex
- Incorrect usage of words, grammar mistakes
- Incorrect verb tense or subject-verb agreement
- Misspellings

#### Sensitive categories not permitted on the site

- Black Magic, Astrology & Esoteric
- Cosmetic Procedures & Body Modification
- Dating
- Drugs & Supplements
- Get Rich Quick
- References to Sex & Sexuality
- Religion
- Sexual & Reproductive Health
- Weight Loss
